
Company Profile

Angus-Hamer, Incorporated is a California based network consulting firm / Information Technology reseller specializing in Information Systems Project Management, implementing TCP/IP Networks, Systems and Security Management, Low Voltage Communications System Design, Internet/Intranet Information Services and Information Technology procurement. Angus-Hamer was incorporated in California on January 1, 1996. Our firm was founded by former Hewlett-Packard Network Consultants and Software Engineers to meet market demand for network technology integration services. Averaging over 30 successful years of information technology experience, our partners provide and manage a wide variety of network related consulting services ranging from management consulting, project management, network requirements analysis, network design, detailed network implementation services and IT procurement services. Our customer range includes: educational institutions, the electronics industry, health, marketing, financial, and many State and local government agencies.

Angus-Hamer is organized around the following four core areas of related consulting expertise:

- 1. Network, Systems, and Security Consulting, including:**
 - General Network Operating Systems (UNIX, Microsoft, and Novell) Planning, Design, Implementation and Maintenance. Angus-Hamer has UNIX, Novell, and Microsoft-certified engineers on staff.
 - Data Network Security (security auditing, firewalls, intrusion detection, authentication, penetration testing, etc.) planning, design, implementation, and maintenance services.
 - Internet Information Services (DNS, E-Mail, WWW, etc.) planning, design, implementation, and maintenance services.
 - Data Network Electronics (LAN, WAN and MAN) Planning, Design, and Implementation Services.
- 2. Technical Information Systems Management Consulting**
 - Application systems needs analysis, software vendor evaluation, fit gap analysis, project management, technical budgeting, RFP development and implementation services.
 - Technical organizational analysis and restructuring consulting.
 - Temporary technical management staffing.
- 3. Intelligent Building Planning, Design, and Implementation Management Services**
 - Voice, Data Systems, CATV, Audio Visual, Public Address, Fire Alarm, Intrusion Detection, and other low voltage communications systems.
 - Angus-Hamer has a Registered Communications Distribution Designer (RCDD) and a National Institute for Certifications in Engineering Technologies (NICET) Level 4 Designer on staff. Temporary technical management staffing is offered as well.
- 4. Information Technology Product Procurement**
 - Product procurement staff has over 40 years of collected experience.
 - Established relationships with all of the top manufacturers in the Information Technology arena, including Hewlett Packard, Cisco, Juniper, Dell, Symantec, Adobe, Microsoft, Viewsonic, Omnipro & others.

Angus-Hamer has a diverse customer base and extensive experience providing network consulting solutions to commercial, government, banking, and educational customers.
